

## energy from waste/industrial ■■■■

### project name ■■■■

Derwentaugh Ecoparc

### project value ■■■■

£25 million

### description ■■■■

The biological and mechanical waste treatment facility by Newcastle firm Graphite Enterprises in Derwentaugh, Gateshead was recently approved by the Council.

The Ecoparc will create 61 permanent jobs and is designed to handle and safely treat household, commercial and green waste.

The site will be able to accept 500 vehicles a day and will be able to treat around 160,000 tonnes of household waste, 80,000 tonnes of commercial waste and up to 60,000 tonnes of green waste per year.

The project also includes an education facility and classroom for 30 children and a safe viewing glass to actively invite schoolchildren to learn more about the process and raise awareness about how waste is handled.

### client ■■■■

Graphite Enterprises Limited
